

DOMINICA CITIZENSHIP BY INVESTMENT PROGRAMME

A RESPECTED PROGRAMME FOR GLOBAL INVESTORS

Established in 1993, the Dominica Citizenship by Investment Programme is one of the most reputable and cost-effective second passport solutions in the world. This government-backed initiative provides eligible investors with a secure and efficient route to Dominican citizenship through approved economic contributions or real estate investments.

Renowned for its political stability, low crime rate, and sustainable development policies, Dominica offers an attractive lifestyle and a strategic base for international investors seeking greater freedom, tax benefits, and long-term legacy planning.

Successful applicants and their families gain full Dominican citizenship, including the right to live, work, and travel as nationals—without the need for relocation or physical residency.

WHY CHOOSE DOMINICA?

Dominica's Citizenship by Investment Programme is designed for efficiency and discretion. The entire application can be completed remotely—no mandatory travel or residency is required, and there are no language, education, or management experience prerequisites.

A Dominican passport grants visa-free or visa-on-arrival access to over 140 destinations, including the United Kingdom, Schengen Area, Singapore, Hong Kong, and China. In today's world, this provides unparalleled flexibility for global entrepreneurs, frequent travellers, and high-net-worth individuals.

Dominica also offers an exceptionally favourable tax regime, with no taxes on worldwide income, wealth, capital gains, or inheritance. Citizenship is lifelong and may be passed down to future generations, ensuring long-term security and strategic advantages for families.

Dual nationality is fully recognised, allowing applicants to retain their current citizenship without restrictions.
